

Installation Guide

1. Download pywikibot developer version 3.0-dev from
<http://tools.wmflabs.org/pywikibot/>
 or use this direct link to download: tools.wmflabs.org/pywikibot/core_old.tar.gz
 Note: annlightment won't work with versions 2.0 or lower
2. Extract core_old.tar.gz to any location. Go to this location (core_old) and make a link of its subfolder pywikibot
3. Copy the link into annlightment folder and name the link 'pywikibot'
4. Make sure the annlightment folder contains a 'user-config.py' (It should already exist)
5. Now copy the family file 'TillsWiki_family.py' (located in annlightment folder) to core_old/pywikibot/families
6. To start the program got the annlightment folder and run annlightment.py: \$
`python3 annlightment.py upload path_to_ANNOgesic_operon_gff path_to_ANNOgesic_merge.csv Q###`
 You can also run `python3 annlightment.py -h` to get help. Annlightment may ask you to enter the passphrase for the Bot account.
