Installation Guide

1. Download pywikibot developper version 3.0-dev from
   http://tools.wmflabs.org/pywikibot/
   or use this direct link to download: tools.wmflabs.org/pywikibot/core_old.tar.gz
   Note: annlightenment won't work with versions 2.0 or lower
2. Extract core_old.tar.gz to any location. Go to this location (core_old) and
   make a link of its subfolder pywikibot
3. Copy the link into annlightenment folder and name the link 'pywikibot'
4. Make sure the annlightenment folder contains a 'user-config.py' (It should al-
   ready exist)
5. Now copy the family file 'TillsWiki_family.py' (located in annlightenment
   folder) to core_old/pywikibot/families
6. To start the programm got the annlightenment folder and run annlighten-
   ment.py: $ python3 annlightenment.py upload path_to_ANNOgesic_operon_gff
   path_to_ANNOgesic_merge.csv Q###
   You can also run python3 annlightenment.py -h to get help. Annlightenment
   may ask you to enter the passphrase for the Bot account.
